

MYCOSIS

Heroes of MBU

MYCOSIS

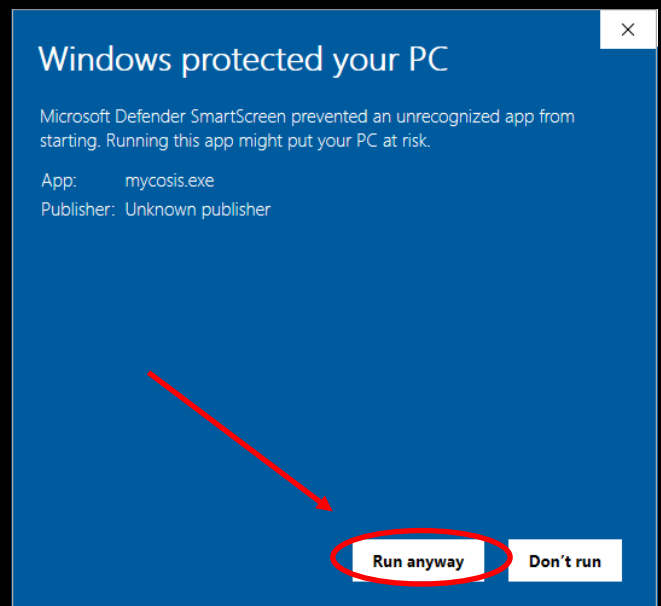

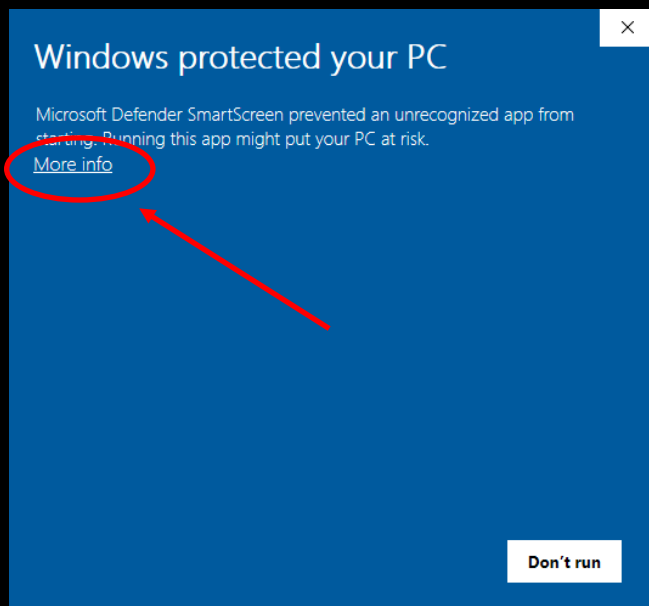

Heroes of MBÚ

Mycosis: Heroes of MBÚ (HoM) is 2D action-adventure game (more action than adventure) written in java. The game is situated in an underground (secret) laboratory complex. The main character is a scientist who is trying to figure out what is the source of a strange fungal disease transforming all humans to bloodthirsty zombies. The basic gameplay includes fighting various enemies (mostly the fungus infected zombies), collecting different items and solving some simple puzzles ;) It was mainly inspired by Abuse, Half-life and everyday laboratory work :)

Run program by execution (double click): mycosis.exe

...when: Windows protected your PC

Please report any bug and send "error.log" to address:

F11 Print screen
F12 Fullscreen/Windowed

For multiplayer game you must "Allow access" trough firewall

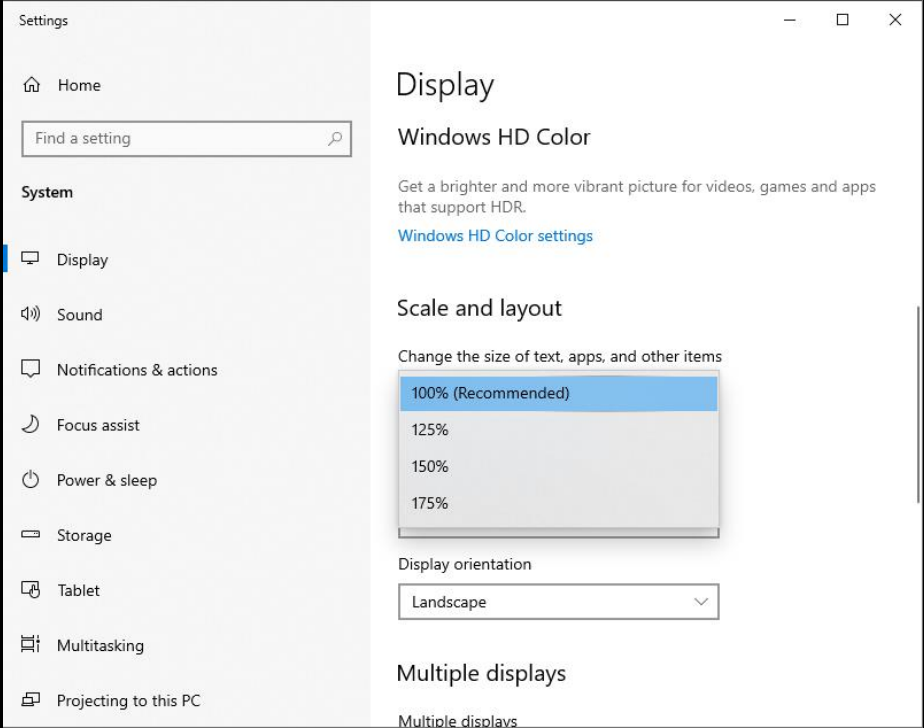

Problems with proper resolution in full screen mode:

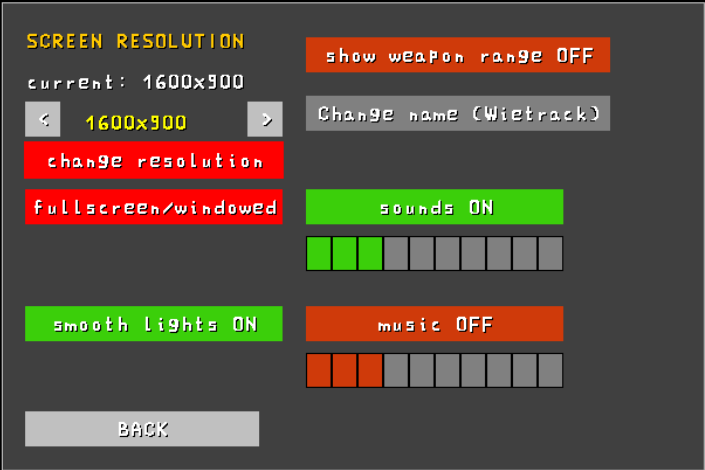

e.g.: full screen game display is not fitting the monitor display

It could be caused by "Scaling" larger than 100% in Windows "Display settings"

You can also try to change the game resolution to maximum in "Options,, menu or play the game in "windowed" mode.

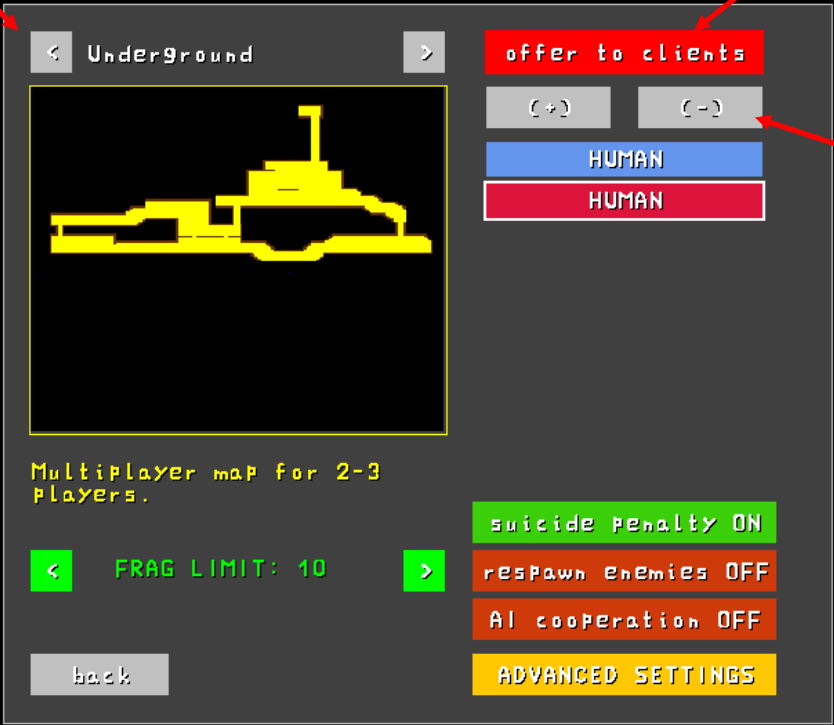

LAN Multiplayer:

1) One player should create a LAN server

II. Set the map

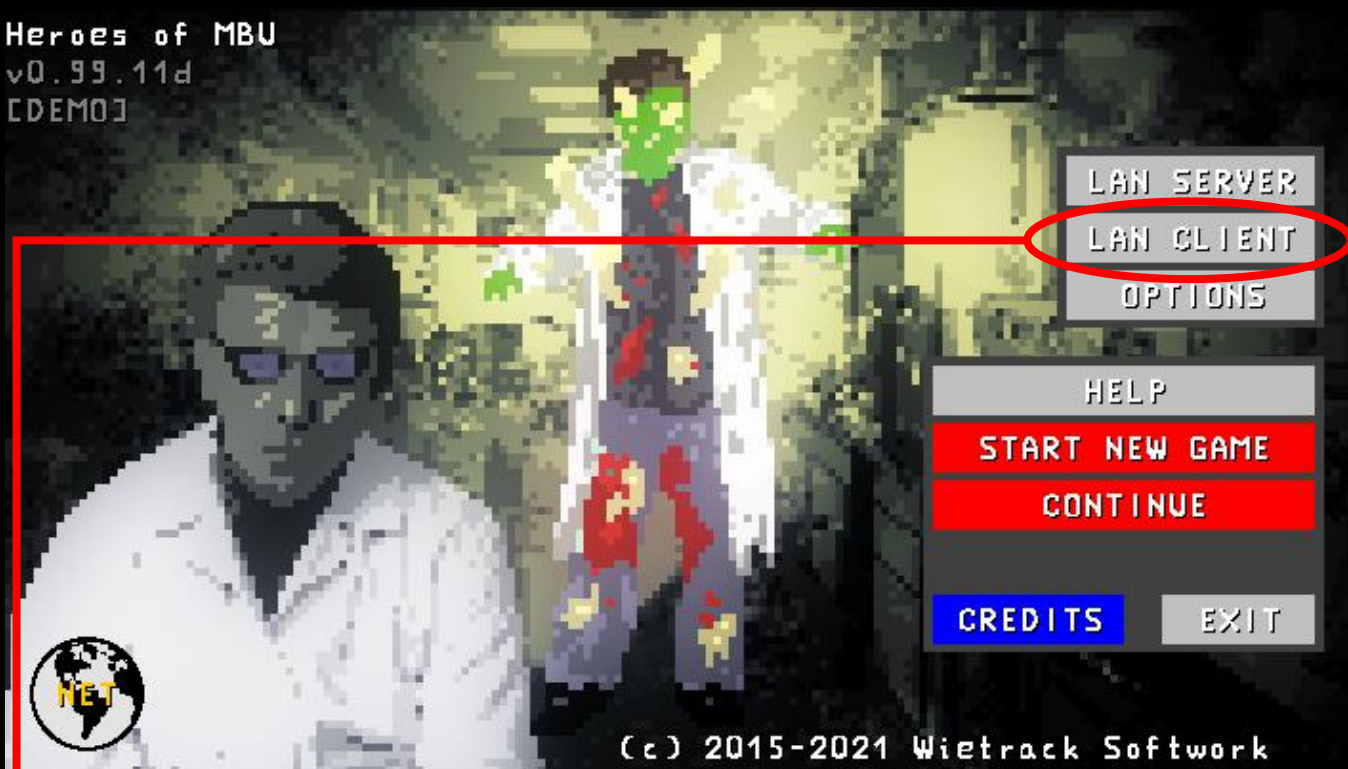

III. Offer to clients

I. Set the number of players

LAN Multiplayer:

Heroes of MBU
v0.99.11d
[DEMO]

2) The others can connect to the server
